TROPICAL CYCLONE BULLETIN NO. 7 Tropical Storm ROSAL (PAKHAR)

Issued at 5:00 AM, 12 December 2022 Valid for broadcast until the next bulletin at 11:00 AM today

"ROSAL" FURTHER INTENSIFIES WHILE MOVING NORTHEASTWARD AWAY FROM THE COUNTRY.

Location of Center (4:00 AM):

The center of Tropical Storm ROSAL was estimated based on all available data at 770 km East of Calayan, Cagayan (19.4°N, 128.8°E)

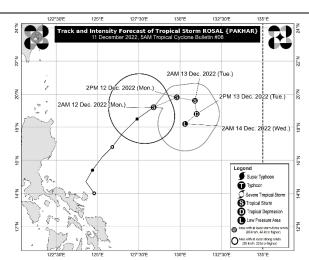

Intensity:

Maximum sustained winds of **85 km/h** near the center, gustiness of up to **105 km/h**, and central pressure of **994 hPa**

Present Movement: Northeastward at 20 km/h

Extent of Tropical Cyclone Winds:

Strong to gale-force winds extend outwards up to 280 km from the center

TRACK AND INTENSITY FORECAST

Date and Time	Center Position				sity	Movement
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	dir. and speed (km/h)
12-Hour Forecast 2:00 PM 12 December 2022	19.8	129.8	875 km East of Extreme Northern Luzon	75	TS	ENE 15
24-Hour Forecast 2:00 AM 13 December 2022	19.6	130.9	990 km East of Extreme Northern Luzon	65	TS	E 10
36-Hour Forecast 2:00 PM 13 December 2022	18.8	131.0	990 km East of Northern Luzon	55	TD	S Slowly
48-Hour Forecast 2:00 AM 14 December 2022	18.2	130.3	915 km East of Northern Luzon	-	LOW	SW 10

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Tropical Cyclone Wind Signals hoisted at this time.

MMSS-07 Rev.2 / 03-01-22

TROPICAL CYCLONE BULLETIN NO. 7 Tropical Storm ROSAL (PAKHAR)

Issued at 5:00 AM, 12 December 2022 Valid for broadcast until the next bulletin at 11:00 AM today

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall

ROSAL is less likely to directly bring heavy rains (which may trigger flooding or rain-induced landslides) in the country throughout the forecast period.

Severe Winds

In the next 24 hours, the surge of the Northeast Monsoon partly enhanced by this tropical storm may bring occasional gusts reaching gale-force over Batanes and strong breeze to near-gale strength over Babuyan Islands, and the coastal and upland areas of Ilocos Norte, northern and eastern Cagayan, and eastern Isabela.

HAZARDS AFFECTING COASTAL WATERS

- Under the influence of the surge of the Northeast Monsoon partly enhanced by ROSAL, a marine gale warning is
 in effect over the seaboards of Northern Luzon. For more information, refer to Gale Warning #26 issued at 5:00 AM
 today.
- In the next 24 hours, the combined effects of the surge of the Northeast Monsoon and the tropical cyclone may also bring moderate to rough seas over the seaboards of Central Luzon (1.5 to 3.5 m) and the eastern and western seaboards of Southern Luzon (1.2 to 3.0 m). These conditions may be risky for those using small seacrafts. Mariners are advised to take precautionary measures when venturing out to sea and, if possible, avoid navigating in these conditions.

TRACK AND INTENSITY OUTLOOK

- Tropical Storm ROSAL is forecast to move generally northeastward until this afternoon before turning eastward for
 the remainder of today. During this same period, this tropical storm is forecast to maintain its present intensity,
 although a short window of slight intensification is not ruled out, which may potentially bring it to severe tropical
 storm category within the day.
- By tomorrow, ROSAL will begin encountering increasingly unfavorable conditions associated with the surge of the Northeast Monsoon, which will result in rapid weakening and a southward to southwestward turn in its direction (as the monsoon surge begins to greatly influence its movement). ROSAL is forecast to become a remnant low tomorrow evening or on Wednesday early morning before dissipating shortly thereafter.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.

The next tropical cyclone bulletin will be issued at 11:00 AM today.
